**Reasons for Allowance**

The following is an examiner's statement of reasons for allowance:

The primary reason for allowing the claims is that the manipulative steps of the claimed process -- particularly the steps of (i) depressurizing the reaction mixture to a lower pressure of from 0.1 to 5 bar absolute, (ii) compressing the gas phase with the residual ethylene-containing gas to a higher pressure of from 2 to 20 bar absolute and (iii) absorbing the gas phase into one or more vinyl esters -- are not disclosed nor fairly suggested in the prior art as a procedure for reclaiming residual unreacted ethylene when preparing copolymers via free-radical-initiated polymerization of one or more vinyl esters and ethylene (and optionally other ethylenically unsaturated monomers) at a pressure of from 5 to 100 bar absolute in an aqueous medium by emulsion or suspension polymerization.

Accordingly, claims 1-12 are deemed to define allowable subject matter and are passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Citation of Prior Art**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sung et al is pertinent to the use of a flash tank to flash a portion of the hydrocarbons (e.g., solvent and/or (co)monomer) from a polymer slurry in a process for removing hydrocarbon from a polymer slurry.

Tanaka et al is pertinent to the continuous production of ethylene-vinyl acetate copolymer by a process wherein ethylene discharged from the polymerization vessel is solubilized by vinyl acetate in a heat exchanger and the resultant mixture introduced into the polymerization vessel.

Neither reference, taken separately or in combination, can be said to teach or fairly suggest a process for reclaiming residual unreacted ethylene as claimed herein.

Any inquiry concerning this should be directed to Examiner F. M. Teskin whose telephone number is (571) 272-1116. The examiner can normally be reached on Monday through Thursday from 7:00 AM - 4:30 PM, and can also be reached on alternate Fridays.
